Cultivating Community and the United Nations Sustainable Development Goals

Mapping our contribution to the United Nations Sustainable Development Goals, and where the risks and opportunities lie

June 2022

About this report

This is our third SDG Report with updated mapping of our programs as of April 2022 as compared to the 2021 report. For detailed information as to the Goals and our mapping process, please see the 2020 report.

Each year we review our contribution to the goals, mapping new projects or new ways we are delivering existing projects. This process informs where we are delivering, where we can improve and if we have been successful in our aims of the previous year.

Overview of our impact

Comparing 2020/21 with 2021/22.

Top 5 Sustainable Development Goals

This year, Responsible Consumption and Production joined our top five with 39 initiatives matching. This dropped Reduced Inequalities to 6th place.

Mapping against each SDGs and their targets

This year we mapped 76 of our current initiatives against the SDGs and their targets: aligning to 14/17 SDGs, and 63/169 targets.

Most Significant Change

Our biggest increase in initiatives matching to an SDG was 14 new initiatives matching with Goal 4. This can be understood through an increase in workshops and fee for service projects including educational elements.

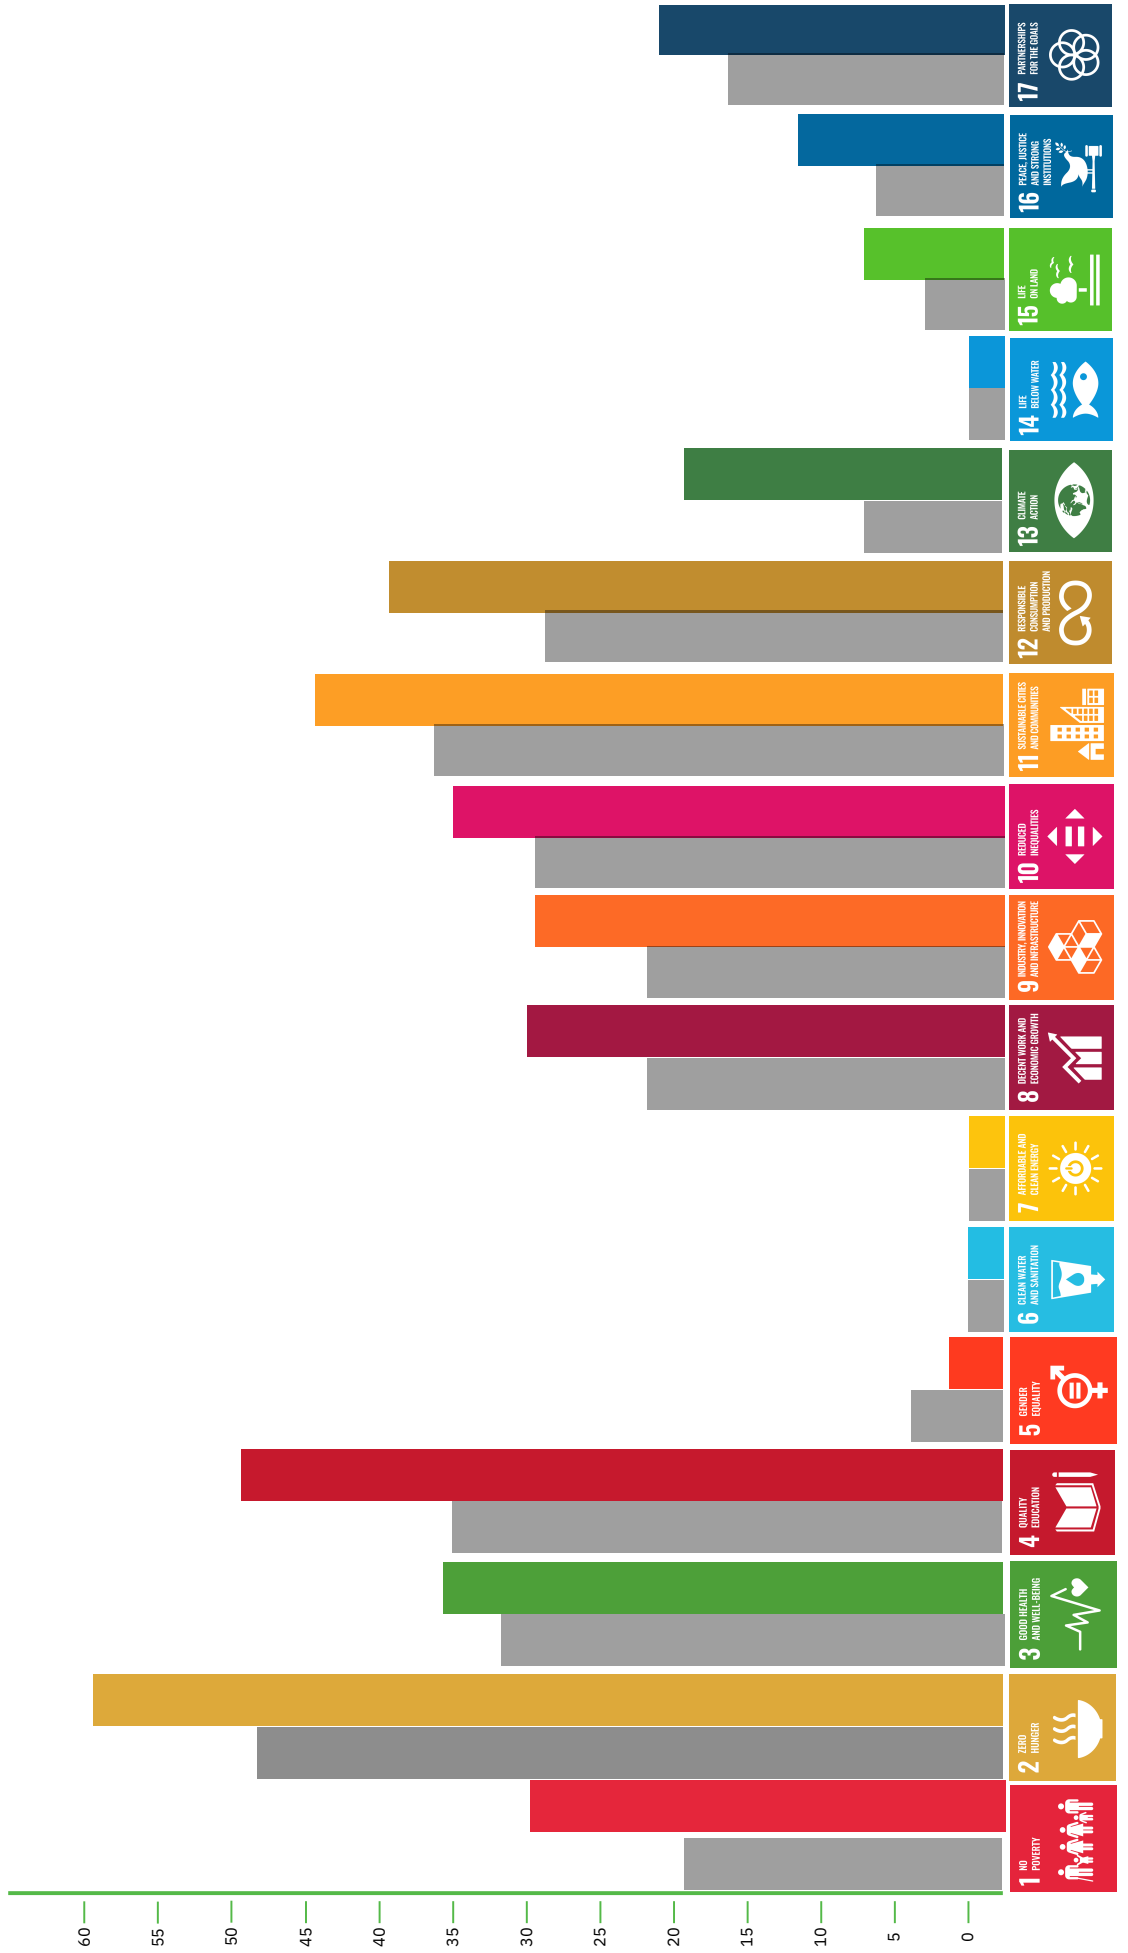

Key initiatives that have contributed to Goal 12 joining our Top 5 Goals include our Open Gardens Victoria project with Bapcare - this initiative supported diverse communities to build skills in responsible food growing and food waste and reached 7 out of the 11 targets of Goal 12.

Observing the past year

Coming out of the COVID-19 Pandemic saw a more comprehensive range of activities commence, seeing an overall rise in meeting each target. While still being our most met goal, Goal 2 Zero Hunger saw an overall decrease in the percentage of activities aligning (-23%) - primarily due to the broader range of activities commencing that went beyond food relief including more gardening collaborations and workshops, as well as larger projects that encompassed a range of activities such as Lets Keep Cooking North Richmond.

Mapping against the SDGs

This graph shows the number of times each of our programs matched with each SDG this year as compared to last year (shown in grey).
